Question from client. Can you text answers so i can forward it to him..

Fwd: This power bloc how far out do I inject with it and does it test in pa and how long does it last do you know off hand?? Thank you

Seth AA (+15612709286)

I would suggest using it 2-3 days out because it burns. It will not test anywhere. Depending on how bad the joint is, it can last up to three weeks

this is coming from Dylan he had them on potassium penicillin in gentacin, looking for something else..

Fwd: I guess we can switch to baytril and sulfur, or baytril and gentacin which ever you think is best. Can you drop it at my house before you leave? I also need a bottle of ace
